

September, 2015 - Bladel, the Netherlands

Hendor selected for a major project to large prestigious UK Aero Engine Manufacturer

In collaboration with Hendor-pe UK Ltd, Hendor were selected and have supplied in August a total of 13 Pumps/Filter Chambers and Eductor Nozzles.

Surface Finishing Engineering Ltd a major UK OEM based in Wolverhampton in the West Midlands secured the project and selected Hendor for their Pump/Filter requirements

The products were DFIT18-30-72A-K-PP and 12 x DFIT165-52H-K-SS including filter media.

The project was to install a large treatment line for AR and O (Aircraft Repair and Overhaul). The units will be configured as Eductor Agitation Systems with by-pass filtration. The line comprises approx. 3000l tanks capable of degreasing and cleaning Aero Engine parts.

The end user is the major UK Aero Engine Manufacturer. Hendor is proud that its high quality products and solutions are used in processes of this renowned company.
