

Hendor continues growth and expands its Sales team

To continue and maintain our growth efforts, with a focus on customer satisfaction and service level, we are excited to announce the following talented person has joined our team.

Jacko Pijper

We are honoured and pleased to announce the appointment of Jacko Pijper as International Sales Director.

In his new role at Hendor, Jacko will be responsible for expanding the Hendor presence and business within the present markets, but with a strong focus on new markets and applications. After achieving his bachelor's degree Jacko joined Quaker Chemical dedicating himself to the development of chemical specialties. Later commencing to international positions in R&D, marketing and sales management.

Prior to joining Hendor, Jacko has been Global Product Manager insoluble anodes at Magneto special anodes and has been responsible for marketing, sales and technical support in their electroplating applications. Jacko has also been involved in setting up Magneto's green field facilities in China and developing business in the Asian and American market.
