## Hendor Launches New Filter System "1K Bofil series"

Economic, Functional and Sustainable

Applying the concept of economic and sustainable design Hendor developed a new series filter systems with 1 cartridge. The simple plug-and-play construction makes this filter system very functional and suitable for laboratories and a variety of processes.

This economic series are therefore only available in a 10" and 20" model and no options. See the brochure for more information.

For questions or further information, please visit our website [www.hendor.com](http://www.hendor.com) or go to the [1K Bofil series product page](#).
